Linux Professional Institute

15/06/2020

Dear victor medrano,

Congratulations on successfully completing the NDG Introduction to Linux I course in the Cisco Networking Academy. By completing this course, you are now prepared to take and pass the first of two exams that make up the LPIC-1 Linux Server Professional certification from the Linux Professional Institute (LPI).

Today's job market is competitive, but the rewards are worth it. With employers reporting they are paying salaries well above company norms, paying out bigger bonuses and offering flexible schedules, there has never been better a time to have strong Linux abilities. Verifying your skills with a professional certification can be a great way to stand out from other candidates, by proving you have the technical abilities required for the job. Now you are ready to sit for the LPIC-1 101 Exam and a step closer to being a stronger prospect in the job market by pairing our certification with other industry-recognized certifications such as Cisco Certified Network Associate (CCNA).

Passing the LPIC-1 101 exam shows that you have a demonstrated command of:

- Linux System Architecture
- Linux Installation and Package Management
- GNU and Unix Commands
- Devices, Linux Filesystems, and Filesystem Hierarchy

To help you accelerate your career we'd like to offer you a discount off of your LPIC-1 exam. To get started, visit: https://www.lpi.org/netacadlpic101

We hope you'll continue with the NDG Introduction to Linux II course and prepare to pass the LPIC-1 102 Exam to complete the requirements for becoming LPIC-1 certified.

Again, congratulations and we wish you continued success!

Sincerely,

G. Matthew Rice
Executive Director
Linux Professional Institute
