

29/06/2020

Dear victor medrano,

Congratulations on successfully completing the NDG Linux II course in the Cisco Networking Academy. By completing this course, you are now prepared to take and pass the final exam that completes the LPIC-1 Linux Server Professional certification from the Linux Professional Institute (LPI).

Certifying your Linux skills can be a great way to show employers that you are invested in your career. By proving you have the skills in-demand in today's workplace, you can set yourself up to get noticed for that next job or promotion, in addition to showing you have the ability to tackle that next big project. Differentiate your professional certification portfolio with verified Linux skills and prove to prospective employers your ability to work in a rapidly changing landscape of Open Source technology adoption. Become a stronger prospect in the job market by pairing our certification with other industry-recognized certifications such as Cisco Certified Network Associate (CCNA).

Passing the LPIC-1 102 exam shows that you have a demonstrated command of:

- Shells, Scripting and Data Management
- Interfaces and Desktops
- Administrative Tasks
- Essential System Services
- Networking Fundamentals
- Security

If you have already taken and passed the LPIC-1 101 Exam, then you are now just a step away from completing the LPIC-1 Linux Server Professional certification. To help you accelerate your career, we'd like to offer you 20% off of your LPIC-1 102 exam. To get started, visit: https://www.lpi.org/netacadlpic102

We hope you'll continue with the NDG Linux II course and prepare to pass the LPIC-1 102 Exam to complete the requirements for becoming LPIC-1 certified.

Again, congratulations and we wish you continued success!

Sincerely,

G. Matthew Rice
Executive Director
Linux Professional Institute
